# 2026 Disease Management List

The OGB Disease Management List shows certain brand and generic preventive drugs covered by your plan based on the participation criteria below.

Who Can Participate?

- OGB members enrolled in one of the Louisiana Blue plans
- Medicare is not your primary health coverage
- You've been diagnosed with one or more of these health conditions:
    - Diabetes
    - Coronary Artery Disease
    - Congestive Heart Failure (CHF)
    - Heart Disease
    - Asthma
    - Chronic Obstructive Pulmonary Disease (COPD)

For additional details regarding the disease management program, please visit http://www.lablue.com/ogb/disease-management

Drugs on this list are covered with no deductible and a lowered copay when you fill them at a network pharmacy, though they may require you or your doctor to follow some rules based on your plan. Please see your benefit plan for a full list of these rules, which are listed as benefits, limitations and exclusions. This list is not all-inclusive and does not guarantee coverage. This list is revised periodically and is subject to change without notice. Medications may be subject to prior authorization, step therapy requirements, and quantity limits. Brands with a generic equivalent available will be charged a penalty equal to the difference between the generic co-pay and the brand name medication. This penalty will not be applied to either member deductible or OOP (out-of-pocket). An approved prior authorization is required to remove the drug selection penalty.

| Drug | Disease State |
|---|---|
| Acebutolol HCl | Hypertension |
| Atenolol | Hypertension |
| Betapace | Hypertension |
| Betapace AF | Hypertension |
| Betaxolol HCl | Hypertension |
